

Preferred Member Plan

Only \$19 per month per system

We can take care of all the remembering and scheduling when you sign up for our annual maintenance preferred member plan. Protect your home with seasonal maintenance for both your cooling and heating systems. **Membership has its advantages, including:**

- **Lifetime Advent Workmanship Warranty** on all Repairs and Replacements.
- **10% discount** on parts and labor.
- **10% Discount** on all Indoor Air Quality Products (IAQ) and all other accessories.
- Your plan is transferable if you sell your home.
- **\$500 Full System Replacement Discount** per system with active PMP membership.
- Two Professional Inspections a year.
- Priority Scheduling.
- No Emergency Service Fees (**\$160 Value**).
- No Dispatch or Diagnostic Fees (**\$80 Value**).
- We arrive in fully stocked trucks with all the common parts needed for same day repair. If we do not have the part, we will get it ordered at no additional cost to you.
- Our technicians are factory trained, drug tested, and background checked for your safety.
- This maintenance plan satisfies all manufacturer warranty requirements. Without a maintenance plan in place a manufacturer could void their parts warranty according to the manufacturer's terms & conditions.

Ensuring Maximum Comfort and Performance

Our technicians keep your cooling and heating system operating at peak efficiency. We'll find and correct problems before they become costly emergencies. Here are just a few items we do at every visit:

- ✓ Clean condensation (drain) line, flush and test.
- ✓ Test unit in A/C and Heat modes.
- ✓ Check supply and return air temperatures.
- ✓ Replace smoke/fire alarm batteries once a year.
- ✓ Check thermostat for accuracy and replace batteries, if needed.
- ✓ Check amp draws on all motors and systems.
- ✓ Check refrigerant pressures.
- ✓ Check all connections and contacts.
- ✓ Check all capacitors for proper size and operation.
- ✓ Check blower wheel for cleanliness and balance.
- ✓ Visual inspection of ductwork and leak check.
- ✓ Check for overgrown vegetation around condenser (outdoor) unit.
- ✓ Water rinse condenser (outdoor) coil.
- ✓ Inspect cleanliness of evaporator (indoor) coil and drain pan.
- ✓ Check for float switch and check for proper operation.
- ✓ Inspection of grilles.
- ✓ Install customer supplied air filter.
