Advent Air Introduces New System to Reduce Indoor Air Pollution

Homeowners and commercial customers alike benefit from cutting-edge technology

LEWISVILLE, TX (December 12, 2013) – Did you know the air inside your home or office can be up to 100 times more polluted than the air outside?

In fact, the U.S. Environmental Protection Agency has named indoor air pollution as one of the Top 5 environmental risks to public health.

Unfortunately, while your HVAC filter captures many airborne particles, it can't combat ultra-small pollution such as volatile organic compounds (VOCs) that make up odors and smog, or most airborne bacteria, viruses and allergens. This minute pollution has everyday sources: traffic, pets, cooking, garbage, renovations and projects, cleaning agents, mold, mildew, laundry and bathrooms. They create odors, can trigger allergies and aggravate or cause illnesses.

Recognizing this persistent and growing health issue, [Advent Air Conditioning](#) of Lewisville has introduced a cutting-edge air purification system for heating and air conditioning systems, designed specifically to combat this level of air pollution and vastly improve the quality of the air you breathe. The Ultravation® UVPhotoMAX™ Signature Series is a whole-house air purifier that uses the science of nanotechnology and photocatalysis, powered by a patented, adjustable UV light design. It purifies and sanitizes the air circulating through residential or commercial environments up to 5,000 sq. ft.

“There’s an awful lot of sophisticated science behind this product, but the bottom line is that the UVPhotoMAX purifier helps our customers breathe the cleanest air possible,” says Mike Douglas, CEO of Advent Air. “In addition, because the purifier clears the air of harmful contaminants, it allows for better filtration through your HVAC unit, thus helping to reduce maintenance expenses and extend the life of your system. We highly recommend that our new and existing customers contact us to learn about all the benefits of this new technology.”

For more information on Advent Air Conditioning’s residential and commercial services, including its advanced air filtration systems, call 972.221.4373, or visit them online at www.AdventAir.com.

ABOUT ADVENT AIR CONDITIONING

Advent Air prides itself in offering the best in service, repair and maintenance for all major air conditioning and heating systems, for both residential and commercial applications. Advent’s installations include top-of-the-line equipment from Trane and Carrier. The company has been a Top 10 Trane dealer for 20 consecutive years, while earning many more awards and accolades from the industry and local “Readers Choice” votes. Advent Air is headquartered at 500 S. Kealy Street in Lewisville, TX. To learn more about their residential and commercial HVAC services, call 972.221.4373, or visit them online at www.AdventAir.com.
